ORD 2056-68

28 March 1968

MEMORANDUM FOR: Chief, TSD/D&E

SUBJECT : [] Proposal

1. The attached proposal from [] was solicited by ORD in response to your requirement for an improved []. It was thoroughly coordinated with [] of TSD who confirmed the importance of the requirement and reviewed the technical points of the proposal. It was agreed at that time that ORD should undertake this proposal with close coordination with TSD.

2. The proposal, with our endorsement, was forwarded to the DD/S&T for funding approval. The DD/S&T elected not to authorize funding for this project as he felt there was relatively little research or exploratory development required to produce an adequate system for TSD and that the bulk of the work required was one of engineering and development with modification for operational use. In this case, he felt this particular task should be undertaken by TSD rather than ORD. It should be made clear, however, that he in no way questioned the criticality of the problem or the technical approach as outlined in the proposal.

3. In accordance with his decision, I am forwarding this proposal for your consideration.
